Weekly Progress Report

Project: **demo_repo** | Period: 2026-10-23 to 2026-10-30 | Audience: Guide

EXECUTIVE SUMMARY (TL;DR)

We have significantly strengthened our system's security and query performance while enhancing the user interface with a polished design and advanced job search filters. These foundational improvements elevate the overall user experience and establish a robust framework for future growth.

COMMITS	NET CODE CHURN	PRIMARY IMPACT	TEST RATIO

Module Deliverables

Authentication

The authentication module achieved a significant milestone by introducing secure login functionality utilizing tokens and password hashing. Additionally, system design improvements were implemented to correctly process cases where a user profile cannot be found during the login process.

- **[FEAT]** feat(auth): add JWT login with bcrypt (Demo Dev, +23/-0) `ecd67bb`
- **[FIX]** fix(auth): handle null user in login (Demo Dev, +8/-1) `b00e299`

Evidence: ecd67bb, b00e299

Database

The database structure was updated to include an index for user identifiers within the application model. This milestone improves overall query efficiency and system performance.

- **[PERF]** perf(db): add index on user_id (Demo Dev, +3/-0) `51f5292`

Evidence: 51f5292

Documentation

A significant milestone was reached with the introduction of new documentation notes. This design update establishes the initial structural framework for the documentation module.

- **[DOCS]** docs: add notes (Demo Dev, +1/-0) `6bc1603`

Evidence: 6bc1603

Job Search

The job search module was enhanced with advanced filtering capabilities to refine listings. Additionally, the user interface was redesigned to seamlessly integrate these search filters with the main job display.

- **[FEAT]** feat(jobs): add job search with filters (Demo Dev, +17/-0) `ee8cbad`

Evidence: ee8cbad

UI

> A significant milestone was achieved in the user interface design with the implementation of a sophisticated color palette for the navigation bar. This architectural refinement enhances the visual hierarchy and establishes a formal aesthetic standard for the system.

- **[STYLE]** style(ui): update navbar colors (Demo Dev, +2/-0) `2cc7db6`

Evidence: 2cc7db6

In progress (open branches)

- **feature/job-alerts**: 1 commit(s) not merged yet, last activity 2026-10-30 (feat(alerts): add email alerts for new matching jobs)
